is of great benefit to your business  
we look forward to being of service to you

# Trailer Jack

A-frame Jacks-Round tube jack with triangle bracket, provide both sidewind and topwind handle types, foot plates and casters are available for options.

# Trailer

# Jack

## Supplier You Can Trust

- The trailer jack is an essential part of safe towing. It is a vertical mechanism mounted on the front, tongue of the trailer. The main function is to raise and lower the tongue/front of the trailer for attachment to the connector or hitch. It allows the trailer to remain in a horizontal position when it is not secured to the vehicle.
- Tow-max trailer jacks are manufactured for campers, boat trailers, A-frame trailers, utility trailers, horse trailers, catering trailers, and many more. We tow-max also supplies spare parts for jack repair and replacement.
- We work with the leading trailer jack manufacturers. Our trailer jacks offer consistent performance with high-quality, and durability.

# A-FRAME JACK

## Features

- Weld-on or Bolt-on mounting for option.
- Black powder coat finish or durable clear zinc plated finish resists corrosion.
- For using with foot plate or caster.
- Internal gearbox provides an attractive look.
- Typical gear ratios designed to reduce the numbers of turns.
- Reasonable handle design can take less time and muscle to crank.

## TRAILER JACK

TOW-MAX A-frame jacks are designed specifically for A-frame trailers. They can be bolted or welded directly onto the trailer frame. Though they are not able to swing up and out of the way like TOW-MAX swivel jacks, A-frame jacks are made to retract completely to ensure enough clearance for safe travel.

## A-frame jacks specifications

# SCISSOR STABILIZER JACK

## Features

- 5000lb support capacity / 2500lb lift capacity each jack
- Adjustable from 4" to 24" vertical height
- Bearing set on crank side for longer jack life
- Eight slotted holes on top jack plate for mounting adjustability
- Black painted finish
- Handle sold separately

TOW-MAX manufactured scissor stabilizer jack brings a lot to the table that could intrigue many RV owners. With heavy duty steel construction for added durability, this scissor jack can either be bolted or welded on, and is ready to handle up to 2.5 tons with adjustable 4-24-inch height.

Its 5,000-pound load capacity is rather impressive as well. This feature should work well with lightweight rigs and keep them stable when encountering uneven ground. It has shown a remarkable to bring a high level of stability in these situations. The scissor jack folds neatly into most trucks or tool compartments to keep ready for roadside emergencies.
